

the window collection

by Senior Architectural Systems

A stylish and practical range of aluminium windows that are the perfect fit for any home

delivering quality
fenestration solutions
since 1991

Tried, tested and trusted aluminium windows that perform as well as they look.

Designed to perform as great as they look, our attractive aluminium windows are the ideal alternative to timber and PVCu systems and the perfect addition to properties both old and new. Boasting sleek slim profile aluminium frames that maximise the sense of light and space, our windows are strong and secure, easy to maintain and can help improve energy-efficiency.

the Senior difference

The largest privately owned fenestration systems house in the UK, delivering quality fenestration solutions since 1991.

Today we offer a flexible range of products that are ideally suited to meet the demands of both traditional and new build homes. Naturally strong and easy to maintain, it's easy to see why aluminium windows are a popular choice and a smart investment.

The strength of aluminium allows our windows to support much larger spans of glazing within a slim frame to give uninterrupted views and greater light diffusion.

Made from responsibly sourced aluminium and fully recyclable, our windows are thermally-efficient to help reduce heat loss from your home and save on energy bills.

We manufacture all our aluminium windows and complementary doors here in the UK to meet the highest safety and security standards.

-  Sustainable Manufacturing
-  Large Network of Support
-  UK Designed and Manufactured
-  Impressive Performance

**PROUD TO BE
UK OWNED**

“Our motto is to ‘give our customers what they want, when they want it’, which is why you’ll find our range of high quality doors and windows is fully supported by a trusted and reliable network of installers across the UK.”

Mark Wadsworth, Managing Director

products that
perform

Beautiful designs that are built to last.

Our attractive aluminium windows offer the best of both worlds, combining style with substance. Helping to perfectly frame views and bathe living spaces in natural light, our aluminium windows also offer exceptional acoustic and thermal performance.

- ✓ **Save money** on your heating bills
- ✓ Help **reduce external noise** pollution
- ✓ **Compliant with approved document L** of the Building Regulations to offer improved energy-efficiency
- ✓ Enjoy cosy and peaceful interiors **whatever the weather**
- ✓ Available in an almost **limitless range of colours** and finishes and **premium quality hardware** available
- ✓ **Tried, tested, and trusted solutions**

Solutions for every style.

Our patented PURE[®] and slimline Ali VU aluminium windows are available in a choice of opening styles and colour options, for a bespoke finish both inside and out. All our aluminium windows are fully compliant with the latest security regulations, including PAS 24, approved document Q of the Building Regulations and Secured by Design.

Ali VU windows

Thermally efficient, with a high-performance polyamide thermal break

Compatible with both double and triple glazing for extra thermal and acoustic performance. Fully security and weather tested

Fully compliant with Part L and Part Q

Hard-wearing, durable and easy to maintain

AliVU
WINDOW SYSTEMS

Ali VU - our stylish and flexible aluminium window system.

Sleeker than PVCu and easier to maintain than timber, the natural strength of aluminium means larger spans of glazing can be supported in much slimmer frames, giving uninterrupted views and copious amounts of natural light.

- Large spans of glazing can be specified, ideal for maximising the flow of daylight into a room
- Strong yet slim aluminum frames for fewer sightlines
- Available in a wide range of options including heritage, contemporary and slimline
- Available as a top hung, side hung or French casement
- Fully weather and security tested

Ali VU windows: design options

Versatile, affordable and built to last, our Ali VU aluminium top or side hung casement windows offer a range of different design features.

Our Ali VU aluminium windows can be used to create exciting new design schemes or to complement existing architectural features. The Ali VU system is available as a top or side hung casement window and benefits from a slim yet secure aluminium frame which allows you to create light and airy interiors with maximum peace of mind.

The perfect partner to our range of Ali aluminium doors

Available in an almost limitless range of colours and finishes

Durable and easy to maintain

Choice of square or chamfered beads

Radius, flat faced, stepped and flush faced vent options

Fully weather and security tested

AliVU
WINDOW SYSTEMS

Ali VU Casement

Traditional top-hung window

Also available in a side hung option

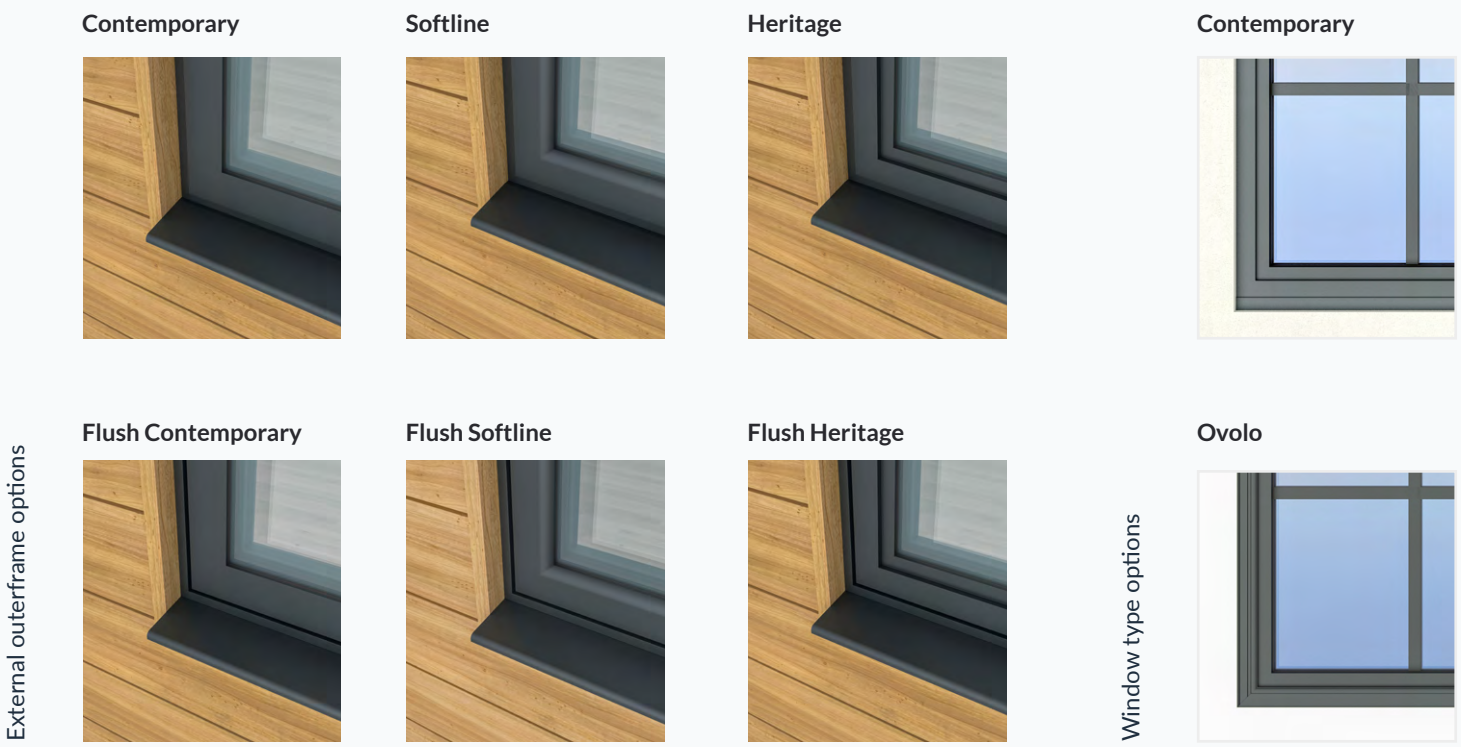

Casement Style:

This attractive style of window creates a clean and contemporary finish, with the window closing 'flush' to the outer frame.

Ali VU French Window
Elegant design for wider openings

French Window:
Our Ali VU aluminium windows are also the perfect partner for period properties.

External outerframe options

Window type options

Side Hung: 950mm x 1400mm

Available in double or triple glazing up to 44mm
System dependent

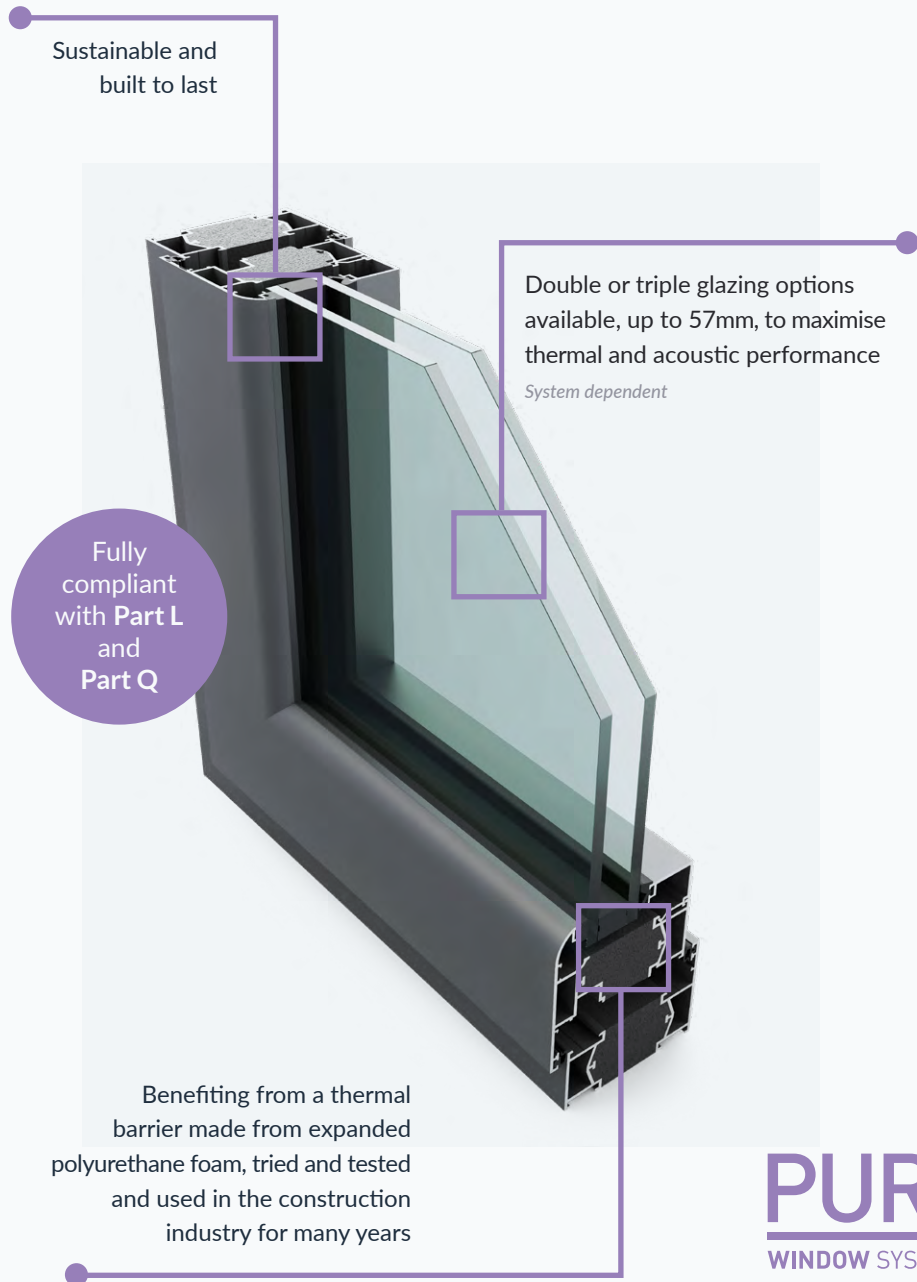

Fully compliant with Part L and Part Q

PURe[®] windows

PURe[®]
WINDOW SYSTEMS

The PURe[®] range takes our already high-performance aluminium windows to the next level, offering even greater energy-efficiency and protection from the elements.

The cutting-edge patented system is the first on the UK market to benefit from an enhanced thermal barrier manufactured from expanded polyurethane foam (PUR). This material is traditionally used in insulation products as it is so effective in helping to retain heat.

- Cutting edge patented system
- Innovative design allows ultra-low U-values to be achieved
- Available in an almost unlimited range of colours and finishes inside and out
- Available in a range of styles and configurations

PURe[®] windows: design options

Enhance the way your home looks and feels with PURe[®] – our most thermally efficient aluminium window system.

Available in a variety of design options, the patented design combines a sleek aluminium frame with a high-performance thermal barrier created from expanded polyurethane foam (PUR). By helping to cut energy costs and create comfortable living spaces all year long, our PURe[®] windows are ideally suited for both new build and renovation projects.

The perfect partner to our range of PURe[®] aluminium doors

Available with both double and triple-glazing

Available in an almost limitless range of colours and finishes

Fully weather and security tested

Durable and easy to maintain

Exceptional thermal and acoustic performance

PURe[®]
WINDOW SYSTEMS

PURe® Tilt and Turn
Practical solution for controlled ventilation

The PURe® Tilt and Turn window can open inwards from the top of the sash or inwards from the side. This dual opening design gives safe access for cleaning and controlled ventilation.

Typical Sizes:

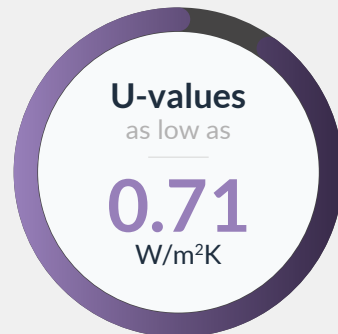

Tilt & Turn: 1500mm x 2400mm

Available in double or triple glazing up to 57mm
System dependent

Fully compliant with Part L and Part Q
