97% of our orders are fulfilled from stock.
Our delivery promise for stocked items is order on day 1, delivery on day 3.

The colours in this Variations Guide are ex-stock, sharing the same lead time as our standard profile. However, we do also have a range of Made-to-Order colours on extended lead times.

Guide to our Lamination Charts

To assist with profile orders, all lamination charts clearly identify all A & B faces.

Standard Casement Window

Drawing identifies internal and external faces on a typically internally beaded frame. This same logic will apply to VEKA & Halo systems.

Section B-B

Section A-A

Face A underbelly of ALL sills to be laminated as shown to ensure continuous colour when viewed from underneath.

Section D-D

Reinforcement guidelines

The following guidelines are based on using galvanised steel reinforcements which are supplied/specified by VEKA for guarantee purposes. Third party reinforcements are not covered by VEKA plc Kitemark certification.

Light Colour Specification

The following colours can be reinforced as per standard white windows. Please refer to the relevant technical manual for reinforcement and installation guidelines on domestic specifications.

Agate Grey
Chartwell Green
Cream
Irish Oak
Pebble Grey
Silver Grey
White

Dark Colour Specification

The remaining foil colours listed here should be treated as dark colour/woodgrain and reinforced/installed accordingly. Please refer to the relevant technical manuals for the correct specifications.

Anthracite Grey
Anthracite Grey Smooth
Anthracite Grey SPECTRAL
Basalt Grey
Beck Brown
Golden Oak
Rosewood
Slate Grey

For further clarification, please contact the Technical Helpdesk Tel: 01282 725360 or email: technical@veka.com

Notes

RAL Colours	Guarantee Notes	Chemical Resistance	Maintenance
The RAL colour references shown in this document and swatch book are shown as the nearest match to that particular foil and as such will not be an exact match. Please agree any colour match with your customers/paint suppliers prior to use. No laminated foil is manufactured to be an exact match to the corresponding RAL colour and Wood grain finishes are difficult to match by RAL colour alone. It is important that the end user ensures any colour match is acceptable before committing to any work or product purchase. It is recommended that the customer/end user uses a freely available foil swatch to make any colour match comparison.	Guarantee is ten years from the date of delivery for all colours for the UK and RoI only. Please contact the VEKA plc customer services department for guarantee periods for supply into other countries. Guarantee periods cover the performance of the foil in terms of its weatherability and colour fastness. The guarantee period as indicated above will become void if the foil is over painted (due to solvents / chemicals found within the paint attacking the acrylic top layer of the foil).	Laminate foils are resistant to normal household cleaning agents e.g. ammonia water, aliphatic benzene, light alcoholic-water solutions, cleaning agents (non-abrasive), water and building materials e.g. cement, gypsum. Laminate foils are not resistant to any other organic solvents, mixtures of organic solvents and preparations containing organic solvents e.g. varnish thinners, varnish removers, polish and adhesives.	Appropriate cleaning with a damp soft cloth using mild detergents, excluding abrasive products. No further maintenance is required for the PVCu.
