

## M70 BEVELLED SYSTEM

The classic choice for homeowners

Achieves A++ rating requirements

# BENEFIT FROM AN ENHANCED BEVELLED SYSTEM

The M70 system has undergone a number of developments to enhance its performance, but maintains everything that was loved about the original system.

The system is a full-integrated, multi-chambered, bevelled 70mm system with steel reinforcement sections. The additional chambers have increased the thermal performance to meet the demanding current and future needs for more energy efficient products.

## Why choose the M70 bevelled window system?

### The perfect match

Whether it's a traditional front and back door, french doors, in-line patio, tilt & slide patio, bi-folding doors or a new composite door. You can benefit from all of these with the one great system to match across your home.

### For enhanced security

With a new updated and contemporary bevel this profile is sure to complement any style of home or commercial development. The demand for bevelled systems within commercial and social housing markets remains as strong as ever, with this style of profile accounting for the majority of installations in these sectors.

With a new updated and contemporary bevel this profile to complements any style of home or commercial development. The demand for bevelled systems within the commercial and social housing markets remains as strong as ever, with this style of profile accounting for the majority of installations in these sectors.

### Ease of maintenance

Life is too short to be sanding and painting timber window frames. Many of the older PVC frames also require some effort. Matrix 70 makes this so much easier... all it takes is a simple wipe with a soapy cloth. No mess and definitely no fuss.

For the best profile... anywhere

### Design

- Contemporary aesthetics with an updated bevel for a great new look.
- Full range of ancillaries available.
- New extended choice of couplings in plain or featured finish.
- Compatible with a range of glazing beads - plain/featured in 28, 36, 40 and 44mm.
- With recent changes to the system, the sizes of windows and doors has increased - enabling more light into the home.

### Glazing

- An "A" energy rating can be achieved by upgrading to a 40mm or 44mm triple glazed sealed unit with an intermediate outer frame. Thermal enhancements can be used to achieve a u-value of 0.8 for the passivhaus requirement.

### Fittings

- We have a great range of hardware that will stand the test of time. Available in white, bright chrome, satin chrome, bright bronze, graphite, gold, black and antique black, complete with a full 10 year guarantee.

### Colours

- VEKA offer a fantastic range of plain colours and wood finishes to offer individual solutions to suit all tastes.
- Foils can be applied to one side or two and different colours can even be specified for the inside and out.

## COLOUR CHOICES

All VEKA profiles are available in a great range of foils and woodgrains as standard. Please note, colours shown are for guidance only and not a direct colour match.

## SECURED BY DESIGN EXPLAINED

Secured by Design was established in 1989 and is owned by the ACPO (Association of Chief Police Officers). It's now the police preferred standard focusing on crime prevention of homes and commercial premises.

In areas where the principles have been adopted crime has reduced by up to 75%.

## ASSURE ENERGY RATINGS REGISTER EXPLAINED

The Assure Energy ratings scheme is used to give your windows a Windows Energy Rating (WER) in alignment with the "traffic light" system used in all domestic appliances.

A++ is the highest rating, which can be achieved on our M70 bevelled system.

# WHY CHOOSE THE M70 BEVELLED SYSTEM?

**The perfect match...**

windows and doors from the same system

**Much more energy efficient...**

achieving up to A++ WER
